

Acknowledgements

Assistance

The individuals credited on the title page primarily undertook the assembly of the OMEX II data set and its subsequent electronic publication on this CD-ROM. However, it would not have been possible without significant assistance from within BODC and beyond.

The following assistance from BODC personnel is gratefully acknowledged.

Meirion Jones, Director BODC, undertook the administrative work associated with the project. For this, he has the eternal gratitude of the project manager (RKL).

This CD-ROM includes between over 500 pages of documentation. All of this was diligently proof read by **Mairi Marshall**. Mairi also undertook the onerous task of reformatting the moored instrument data documentation from flat ASCII text into a presentable format.

Pauline Weatherall prepared the OMEX II bathymetry object included on the CD-ROM and was the cruise data manager on the swath bathymetry cruise.

Mary Mowat undertook the data banking of some of the moored instrument data.

Steve Loch and **Dave Neave** produced much of the infrastructure software without which a data management project on this scale could not even be contemplated. Steve also processed the underway ADCP, BOBO and thermistor chain data. Dave was data manager on one OMEX II cruise.

Polly Hadziabdic, **Gwen Moncoiffé** and **Lesley Rickards** have provided much assistance through informal supervision and advice on areas where they have specialist knowledge.

Mary Robjant was data manager on one of the OMEX II cruise legs.

The following assistance from other members of the OMEX community is gratefully acknowledged:

Olivier Weber (Bordeaux University) provided the core X-ray photographs and associated data profiles.

John Humphery (Proudman Oceanographic Laboratory) provided the seabed photographs and captions.

Steve Groom and **Peter Miller** (RSDAS, Plymouth Marine Laboratory) prepared the satellite image object.

Roland Wollast, Lei Chou and **Bernard Avril** (Université Libre de Bruxelles) prepared the OMEX II project description text.

The fact that 96% of the 460 identified data sets were submitted to BODC bears testament to the fine spirit of co-operation from the following:

The chair of the OMEX SSC, **Roland Wollast**, and the sub-project leaders (**John Huthnance, Paul Wassmann, Peter Burkill** and **Tjeerd van Weering**) provided continuous support to the data management team.

Klaus-Günther Barthel, the OMEX scientific officer in the EU MAST office, is thanked for his timely and effective reminders to OMEX partners of their contractual obligation to submit data.

However, we must not forget to thank each and every OMEX scientist who took the time and trouble to fulfil his or her data delivery obligations.

Financial Support

The OMEX II data management project was funded jointly by the EU (contract number MAS3-CT97-0076) and the Natural Environment Research Council (NERC).

Trademarks and Copyright

The Adobe *Acrobat* Reader software has been included on the CD-ROM and the following is acknowledged:

Acrobat® Reader © 1987-1999 Adobe Systems Incorporated. All rights reserved. Adobe and Acrobat are trademarks of Adobe Systems Incorporated.

There are frequent references in this Users' Guide to the products of Microsoft Corporation. The following are acknowledged:

Microsoft, Windows, Windows95, Windows98, Word, Excel, Access, Access97 and *Access2000* are trademarks of Microsoft Corporation.

All other company and product names herein may be trademarks or registered trademarks of their respective companies.

Accreditation

Under the terms of the OMEX II data policy, all data on this CD-ROM will have entered the public domain by the time this CD-ROM is published. However, it is still necessary to acknowledge the intellectual property rights of the data originators by quoting the source of any data used in subsequent publications just as if the CD-ROM were a journal.

Sufficient information has been provided in the Roll of Honour, in the data documentation and as originator codes tagged to the data for the originators to be identified. It is suggested that data be acknowledged by reference to the originator (e.g. Borges, 2001) with the CD-ROM cited as 'OMEX II Project Data Set, CD-ROM electronic publication, British Oceanographic Data Centre, Liverpool, 2001.'
